

LEAVE YOUR
OLD CHALKBOARDS
IN THE DUST.

RESURFACE WITH EVERASE.

THE BRIGHTEST IDEA IN WHITEBOARDS.

Now there's a fast, easy and inexpensive way to turn your old, dusty, outdated chalkboards into bright contemporary whiteboards.

Everase®. The perfect resurfacing solution that offers outstanding maintenance free performance, proven durability and superior stain resistance, while completely eliminating the mess and expense of removal or replacement of your old boards.

And installation isn't just eco-friendly with no chemicals or unpleasant fumes. It's budget-friendly too. In fact, an Everase conversion is a fraction of the cost of other replacement options.

Small wonder then that Everase has become the absolute leader in chalkboard resurfacing.

FROM CHALKBOARDS TO WHITEBOARDS

Everase comes in easy-to-handle 56 or 100 foot length rolls. Since the pressure sensitive adhesive is factory applied, you simply peel off the backing paper and apply directly over your old chalkboard or previously converted but inferior whiteboard.

In fact, a typical 20 foot chalkboard can be transformed in 30 minutes or less. To get professional results, just follow the simple directions which are supplied with each Everase roll or watch our Installation Video.

NO GHOSTING, NO STAINING, NO DULL, INCONSISTENT COLORS.

Use any commercially available dry erase marker you like, even low-odor markers often preferred by teachers. Our high gloss Everase surface makes colors vividly pop for maximum impact and consistent clarity.

Yet, as the name implies, erasability is unmatched. With no ghost images or discoloration to come back to haunt you. Just use a clean Microfiber cloth or felt eraser. Everase wipes perfectly clean every time.

Plus Everase is more scratch and stain resistant than other whiteboard surfaces and is chemically inert. Typical non-abrasive household cleaning agents will not affect the surface characteristics.

EBOARDS IN THIRTY MINUTES

CREATE THE CLASSROOM OF THE FUTURE TODAY.

One of the most notable impacts of today's technology is that we live in a media saturated world. And nowhere is this more apparent than in the teaching environment.

Classrooms everywhere are enthusiastically embracing the multi-media approach to learning that Interactive Boards provide. Consequently, the decision to resurface your chalkboards with Everase and create a dust-free environment will help to ensure your significant investments in classroom hardware and software are not jeopardized.

Everase – providing solutions for the emerging 21st Century Model for Learning.

“ The number one way that we’ve benefited from Everase is because of the number of computers we have in this school, there’s significantly less chalk dust in our classrooms. ”

Dr. William J. McCusker - President
Cardinal O’Hara High School, Springfield, PA

“ I just want to say thank you for the great work that you and your team has done at our school. Your product has enabled us to cost effectively update the chalkboards in our classrooms to state-of-the-art whiteboards. ”

Charles Kleinschmidt - IT Director
Archbishop Wood High School, Warminster, PA.

“ The teachers are very happy with the product that we’ve chosen. They enjoy the cleaner look, the brightness in the room, and the fact that it works well with the interactive boards that we have. ”

Rich Chiappa - PC Technician
Wilson Area School District, Easton, PA

“ Everase white boards have led to savings in both cost and time for our maintenance department. The students and faculty maintain the boards themselves. It’s easy for us. ”

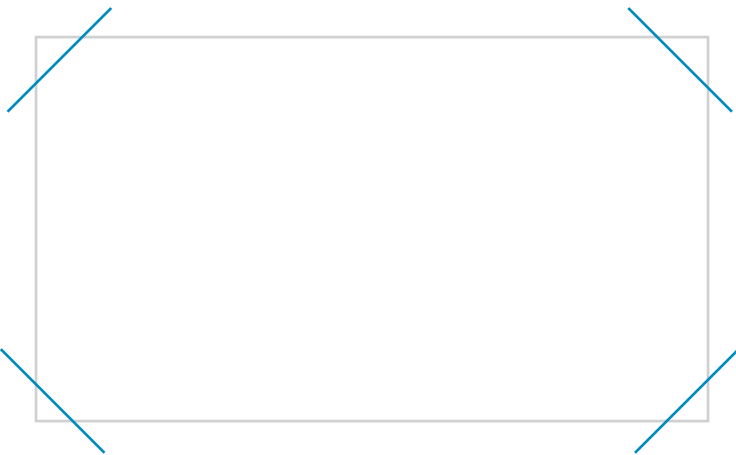

Ken Smith - Supervisor of Buildings and Grounds
Daniel Boone Area School District, Birdsboro, PA
